Statement

ASIC Infringement Notice

MECCA acknowledges that infringement notices have been issued in relation to the late lodgement of financial reports across three entities within our group.

We have never disputed that some of our filings were submitted later than required and we take our reporting obligations seriously.

We have worked constructively with ASIC and our auditors to address these delays and have strengthened our internal processes to ensure timely lodgement going forward.

This matter is now resolved.

As a private company, we remain committed to meeting our regulatory obligations with the same discipline we apply across all areas of our business.
